

ROAD DEVELOPMENT AUTHORITY

PROJECT BRIEF

Design-Build/Turnkey and Completion of a Grade separated junction on the Motorway M1 at Deschartes Street and other Upgrading works

1.0 Project Description

The project consists of the following:

- Construction of a Fly-over along the Motorway M1 to enable traffic from South to enter Port Louis City Centre at Deschartres Street.
- Reconfiguration of the junction at Place D'Armes.
- Construction of a third lane from Place D'Armes to Caudan Roundabout, on Motorway M1 southbound.
- Implementation of an Intelligent Transport System which is used to control several traffic lights from a single control room. The ITS will help to ease congestion and improve traffic management.
- Implementation of a traffic management plan in Port Louis to improve traffic within internal road networks.
