

Executive Summary of Bid Evaluation Report

Design & Build/Turnkey for Countermeasure Works to Slope Failure at Montagne Ory

Procurement Reference No.: E/W/RDA/17/12-19

1. Project Details/Scope of Works:

- Topographical Surveys;
- Intensive Geotechnical Investigations;
- Hydrogeological Investigations and Groundwater Monitoring (if required);
- Preliminary design (within 15 days from the Commencement Date) & detailed engineering of the countermeasure works (within 48 days from the Commencement Date) taking into consideration the existing land acquisition limit;
- Earthworks/Re-profiling works (if needed), provision of earth retaining structures/rehabilitation/retrofitting/strengthening of existing retaining structures;
- Any countermeasure proposed shall to be implemented in the existing land acquisition limits as shown in drawings.
- Stabilisation of approximately 200 m stretch of the escarpment of height varying from 3m to 6m as per location shown in drawings;
- Replacement of any damaged road infrastructure (drain, footpath, etc);
- Setting up and implementation of a traffic management/control scheme for safe passage of road users and pedestrians at all time during the implementation of the works. To ensure that at least one lane is operational for road users during the whole duration of works.
- Relocation of existing services.
- Demolition and carting away of failed part of slope/construction debris as may be generated by the works; and
- Any miscellaneous work as may be required for the completion of the said works.
